Summary

Full Stack Developer with experience in web systems, APIs, integrations and automation, using TypeScript, React, Node.js and Python. I work across the whole system, from the database to the interface, with a focus on business rules, third-party integrations and shipping to production. I currently build Publiva, a SaaS in production with continuous deployment on AWS.

Experience

Full Stack Developer — Publiva (own product)

2026 – present · Remote · publiva.com.br

- SaaS that generates and publishes content to Instagram, Facebook, LinkedIn, Pinterest and WhatsApp.
- Layered API (routes, use cases, repositories) with dependency rules enforced by a test in CI.
- Multi-tenant by organization, with roles, usage-based billing and Stripe plans.
- Job queue in PostgreSQL using FOR UPDATE SKIP LOCKED, driven by a cron (EventBridge).
- CI/CD on GitHub Actions with tests, migrations and deploy to AWS Lambda via OIDC; decisions recorded as ADRs.
- Stack: TypeScript, React, TanStack Start, PostgreSQL (Supabase), AWS Lambda/S3, Stripe, OpenAI.

Developer — Spacetrack Tecnologia

Nov 2025 – Jan 2026 · Uberlândia, Brazil · on-site

- Artificial intelligence assistant integrated with WhatsApp through the Evolution API.
- Data orchestration and processing with Python, AWS SQS and S3 buckets.
- Work on the Java server, a web page and the project's operations dashboard.

Full Stack Developer — Minerva Intermediações de Negócios (Diddy app)

Oct 2024 – Jun 2025, then on demand · Remote

- Development of the Diddy app, from the interface to the backend.
- Dashboards integrated with a GraphQL API.
- Migrated the Node.js/Express backend and the WhatsApp integration server to TypeScript.
- Moved the front end from Bootstrap to Tailwind CSS and worked on Next.js.
- App layouts and animations (SVG and Lottie); report automation with ExcelJS.

Developer (freelance) — Acescode

Feb 2025 – Apr 2025 · Remote

- Customized Odoo 18 for clinic management: scheduling, clinical history, subscriptions, multi-company permissions and WhatsApp integration (Python, PostgreSQL).

Web Developer — Espaço Multiplicidade Escritório Colaborativo

Oct 2021 – Aug 2022 · Brasília, Brazil · freelance

- Built and maintained websites.

Tech stack

Core: TypeScript, JavaScript, React, Node.js, Python

Backend and data: PostgreSQL, MongoDB, REST, GraphQL, Express, Supabase

Integrations and infrastructure: Webhooks, WhatsApp (Evolution API, whatsapp-web.js), AWS (Lambda, S3, SQS), Docker, GitHub Actions

Also: Java, Odoo, Next.js, Tailwind CSS, Three.js

Education

Technologist in Systems Analysis and Development — UNOPAR (2022 – 2025)

Computer Technician — CEBRAC (2019)

Introduction to Data Analysis with Python — Anhanguera (2023)
